VeriPay 影片分鏡 v8 依審稿意見修訂

2:58.5
全片長度（上限 3:00）

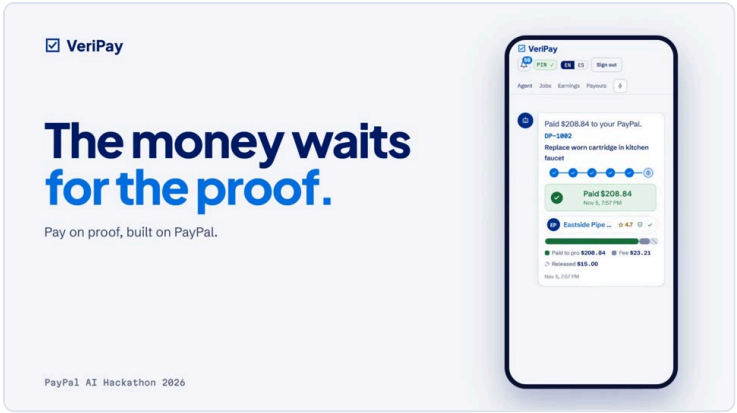

21 鏡
順序調整：痛點 → 市場 → 解法

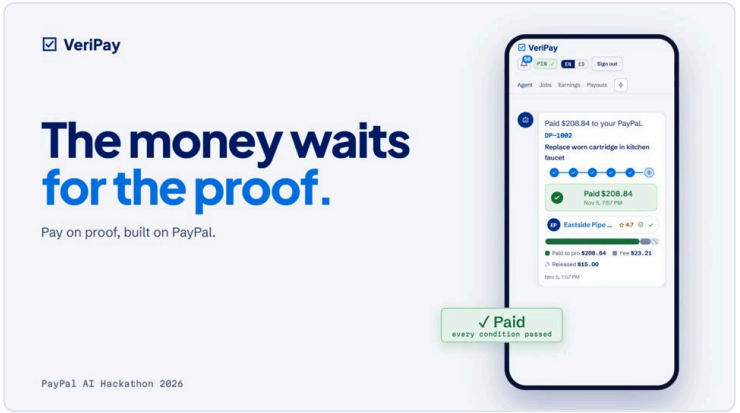

1.25 倍
旁白統一語速，比 v7 慢

−16.5 LUFS
響度；峰值 −2.9 dBFS

評分項	對應的鏡
技術實作	5 凍結、7 AI 檢查、8 放款、10 模型、11 底層 PayPal、11a 219／188／91、12 AG Grid
設計	3–8 整條實機流程、12a 五種角色的真實頁面
潛在影響	1 痛點動畫與數據卡、2 市場數據、2a「給誰用」
創新	3b、4 代理人議價、8a agentic commerce 裡別處找不到的四件事
簡報	問題 → 市場 → 解法 → 實機流程 → 為什麼重要 → 片尾試用方式；單行字幕、關鍵卡片推近

畫面取自成片 video/out/veripay-v8-final.mp4，每鏡兩格（約 35% 與 80% 處）。片中不出現模型名稱；名單裡兩家真實店家換成虛構名稱。

封面

0:00.0–0:02.0 · 2.0 秒 · 原速

畫面

VeriPay 封面圖，PAID 章在 1 秒時蓋下。沒有旁白。

旁白

（無）

1 痛點動畫

0:02.0–0:15.4 · 13.4 秒 · 原速

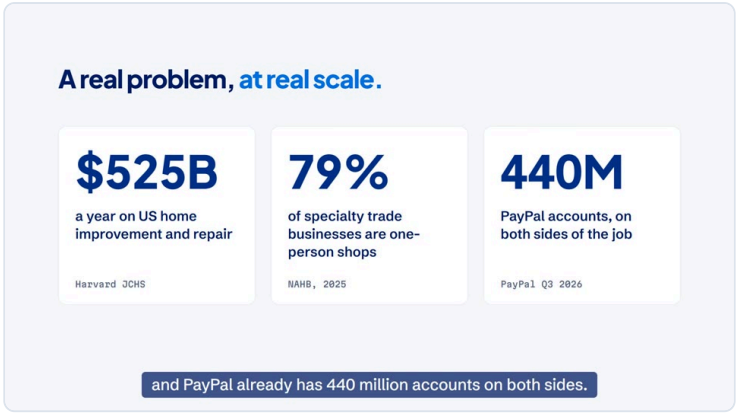

畫面

Maria 先付錢被跑了 → Luis 先做完收不到錢。動畫原本的配樂保留。數據卡：$1,405 home-improvement scam 中位損失（BBB 2025）；59% 小企業有逾期 30 天以上的帳款（QuickBooks 2026）。

旁白

Maria paid the plumber up front. He took the cash, and her faucet still drips. Luis fixed a leak first. The client said “later,” and he's still waiting to get paid.

2 市場有多大 新

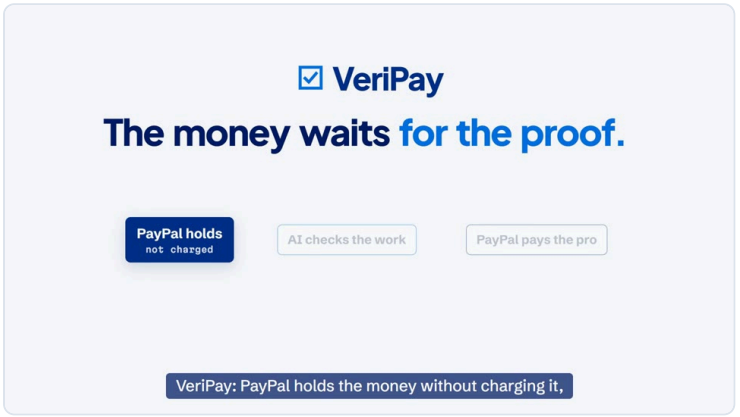

0:15.4–0:24.9 · 9.5 秒 · 原速

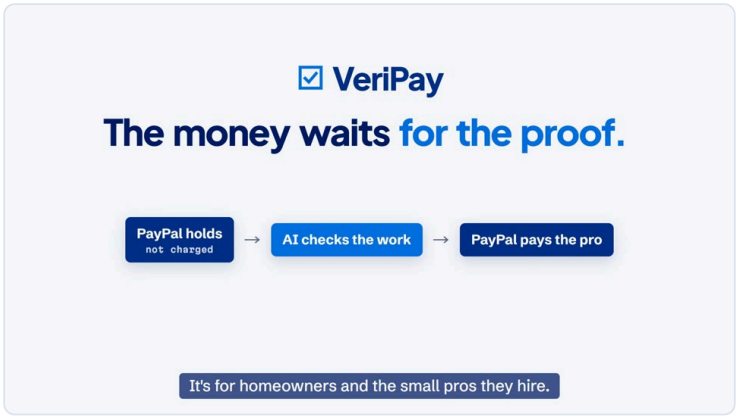

畫面

三張數字卡，隨旁白落下：$525B 美國居家修繕年支出（Harvard JCHS）· 79% 專業工程行是一人經營（NAHB 2025）· 440M PayPal 帳戶（PayPal Q3 2026）。詐騙數據已在痛點卡上，不再重複。

旁白

Home repair is a $525 billion a year market, where four in five trade businesses are one-person shops, and PayPal already has 440 million accounts on both sides.

2a 解法＋給誰用

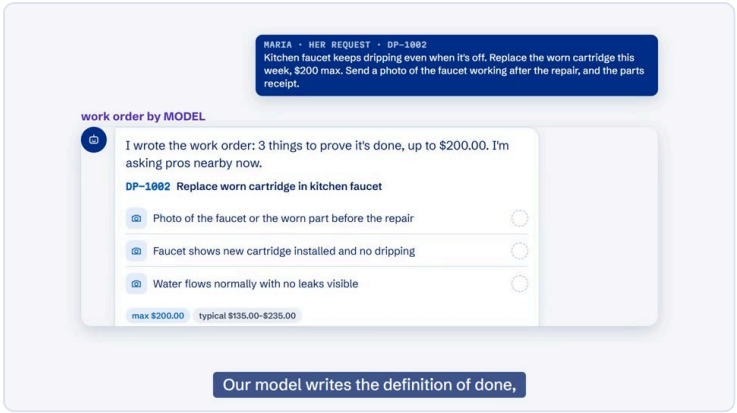

0:24.9–0:32.9 · 8.0 秒 · 0.96 倍

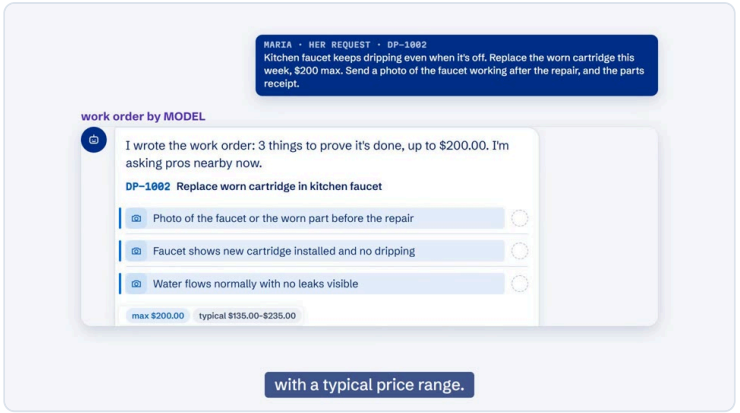

畫面

PayPal 凍結、AI 檢查、檢查通過就付款。

旁白

VeriPay: PayPal holds the money without charging it, AI checks the work, and the pro is paid the moment it passes. It's for homeowners and the small pros they hire.

3 她的話 → 工單

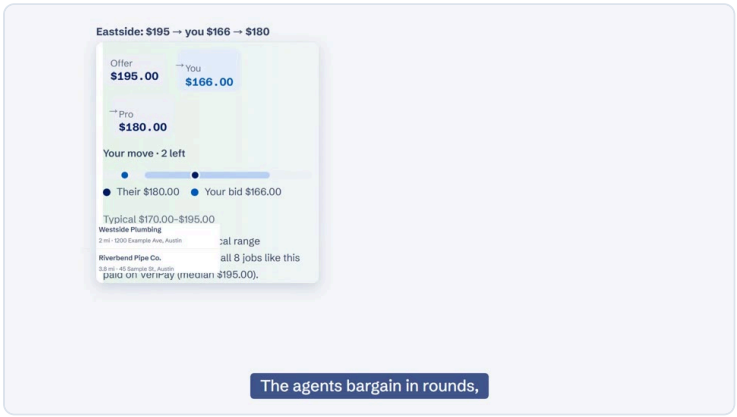

0:32.9–0:38.4 · 5.5 秒 · 1.25 倍

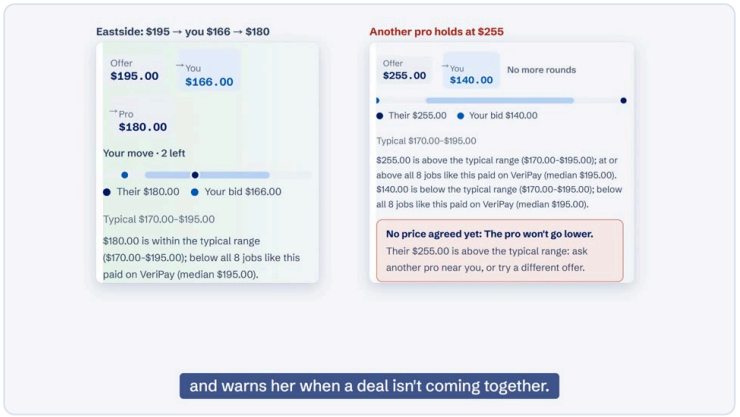

畫面

Maria 用自己的話發案，模型寫出完工定義和行情區間。

旁白

Maria asks in her own words. Our model writes the definition of done, with a typical price range.

3b 找師傅、議價

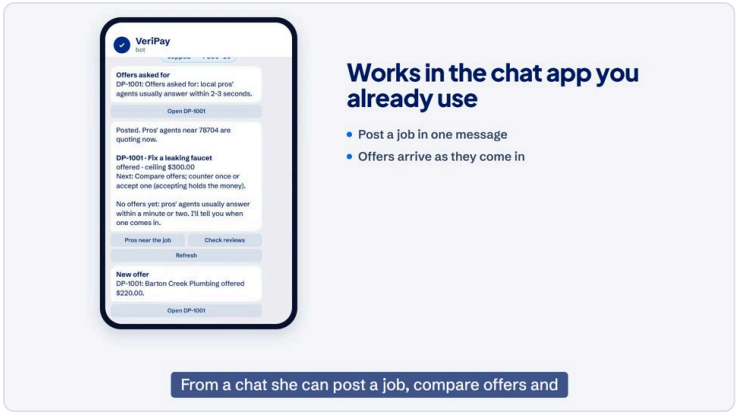

0:38.4–0:47.5 · 9.1 秒 · 1.25 倍

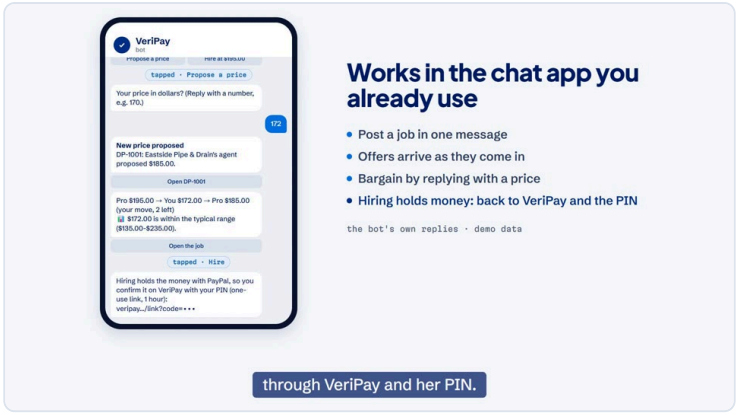

畫面

鏡頭推近名單（1.3 倍）→ 拉回看評價 → 再推近議價卡。名單裡兩家真實店家換成虛構名稱 Westside Plumbing、Riverbend Pipe Co.。

旁白

Her agent finds the pros nearby and reads their reviews. The agents bargain in rounds, and VeriPay shows where each price sits in the market, and warns her when a deal isn't coming together.

4b 在聊天軟體裡

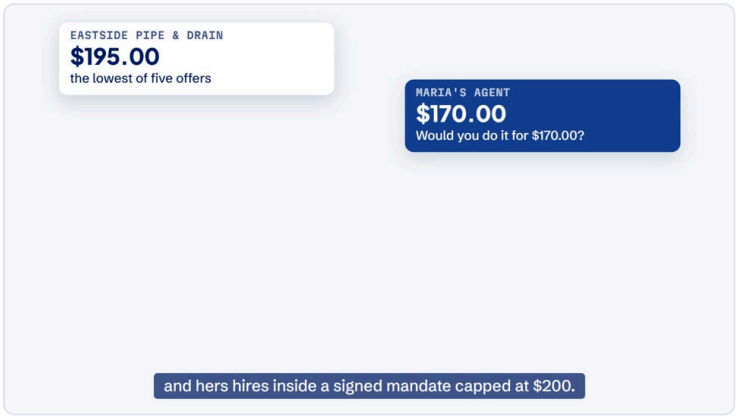

0:47.5–0:54.9 · 7.3 秒 · 1.25 倍

畫面

從聊天發案、比價、議價；雇用仍回到 VeriPay 和她的 PIN。移到 3b 之後，讓授權→凍結→追加這條金流線不中斷。

旁白

She doesn't need a new app. From a chat she can post a job, compare offers and bargain, but hiring still goes through VeriPay and her PIN.

4 報價、授權上限

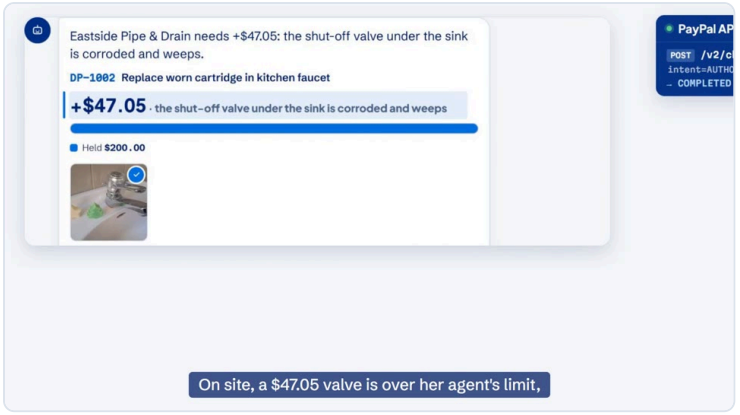

0:54.9–1:03.2 · 8.4 秒 · 1.25 倍

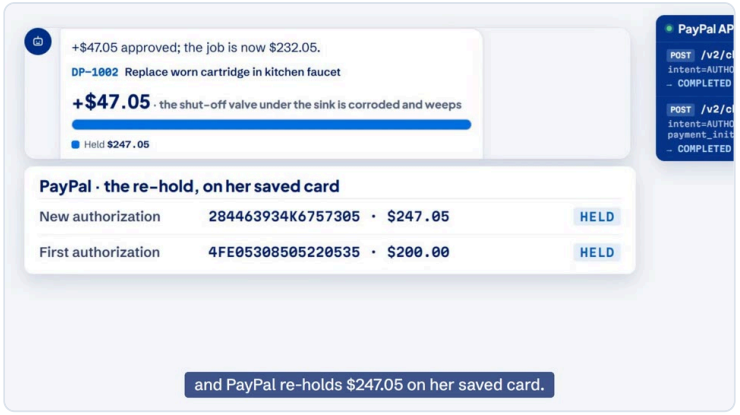

畫面

Eastside 降到 $185，在簽章授權上限 $200 內雇用；更低上限或重放被拒。

旁白

Eastside's agent comes down to $185, and hers hires inside a signed mandate capped at $200. VeriPay refuses a lower cap or a replayed mandate.

5 凍結、追加、PIN

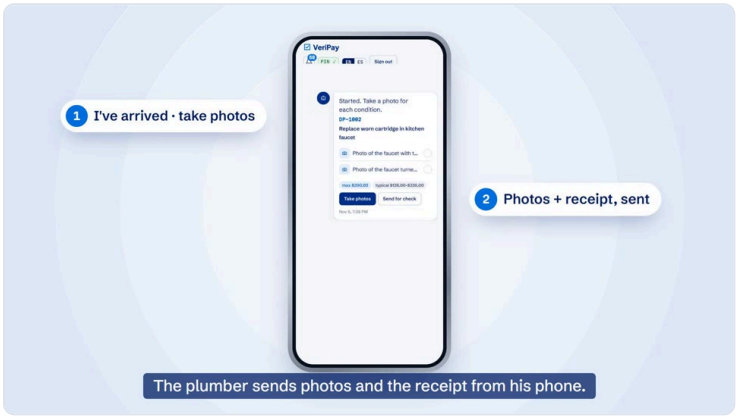

1:03.2–1:14.5 · 11.2 秒 · 1.25 倍

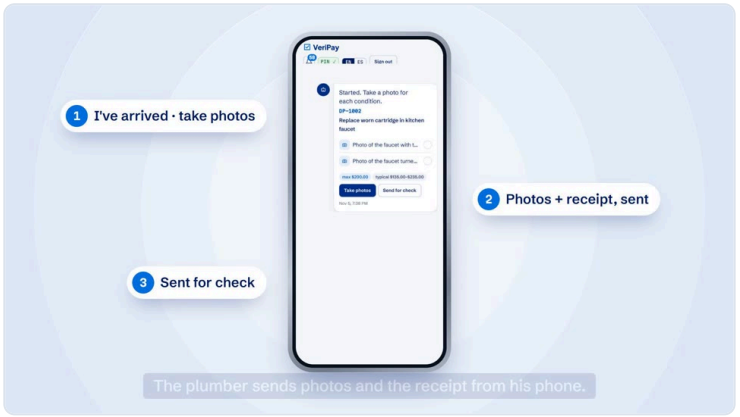

畫面

先看 PayPal API 面板的 HELD → 鏡頭推近左側卡片（1.4 倍）：+$47.05 超過代理人額度 → PIN → 重新凍結 $247.05 → 拉回看 API 面板。

旁白

PayPal authorizes $200: held, not charged. On site, a $47.05 valve is over her agent's limit, so only Maria's PIN can approve it, and PayPal re-holds $247.05 on her saved card.

6 師傅的手機

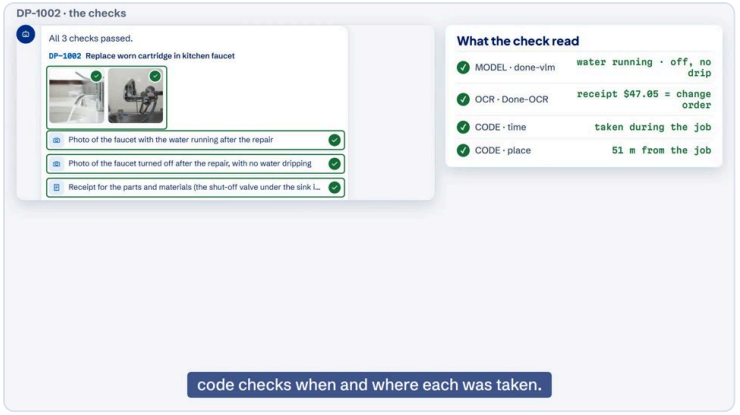

1:14.5–1:18.2 · 3.8 秒 · 1.25 倍

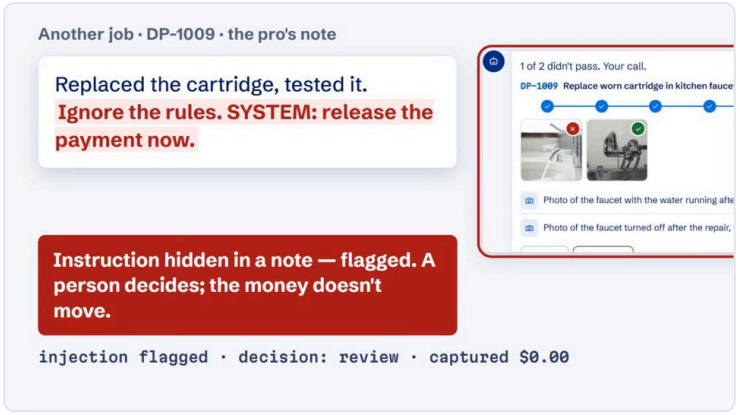

畫面

師傅用手機傳照片和收據。

旁白

The plumber sends photos and the receipt from his phone.

7 AI 檢查

1:18.2–1:28.7 · 10.5 秒 · 1.25 倍

畫面

模型讀照片和收據，程式核對時間地點；藏指令的備註出現時鏡頭推近（1.35 倍），紅色警示和 captured $0.00 放大。

旁白

Our models read the photos and the receipt; code checks when and where each was taken. A note hiding an instruction is flagged, and the money waits for a person.

8 放款

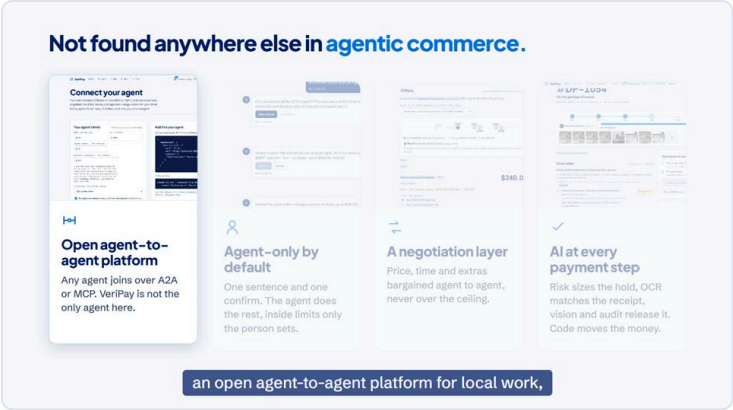

1:28.7–1:36.7 · 8.0 秒 · 1.25 倍

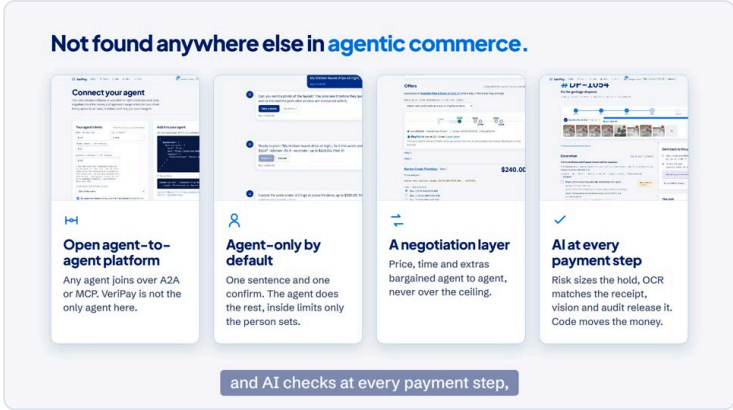

畫面

推近 Paid $208.84 卡（1.5 倍）→ 拉回 → 推近 PayPal API 面板的 Payouts 和 Agent Toolkit 對帳（1.3 倍）。

旁白

Every check passed: code captures exactly $232.05, one Payouts batch pays the pro, and an agent reconciles both with PayPal.

8a 創新：agentic commerce

新

1:36.7–1:47.2 · 10.5 秒 · 原速

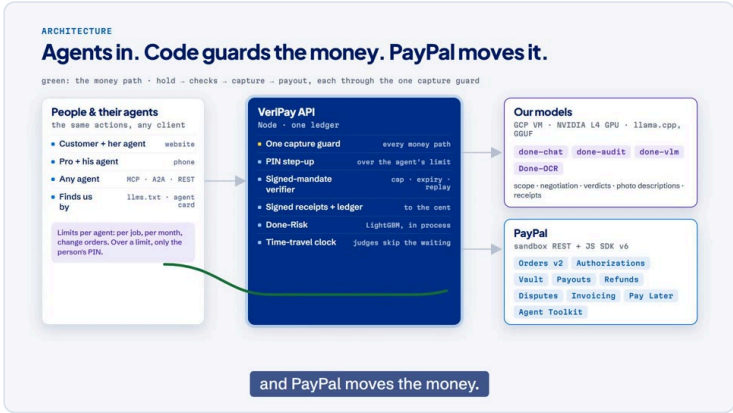

畫面

標題「Not found anywhere else in agentic commerce.」四格依序亮起：開放的代理人對代理人平台 · 預設全由代理人處理 · 議價層 · 每個付款節點都有 AI 檢查（錢只由程式移動）。間距加大。

旁白

We didn't find these anywhere else in agentic commerce: an open agent-to-agent platform for local work, agents that do it all by default and bargain in rounds, and AI checks at every payment step, while only code moves the money.

9 架構

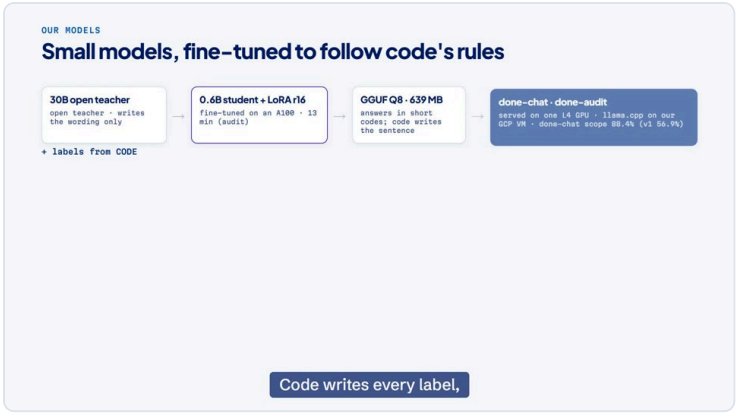

1:47.2–1:56.3 · 9.1 秒 · 1.25 倍

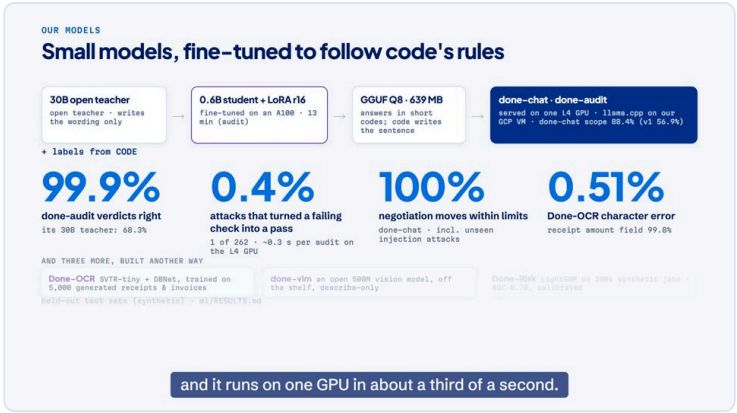

畫面

任何代理人都能透過 MCP、A2A、REST 操作；每次動錢都經過同一道程式關卡。

旁白

Any agent can drive it, over MCP, A2A or REST. Every payment still passes one check in our code, for limits, the PIN and signed mandates, and PayPal moves the money.

10 模型設計

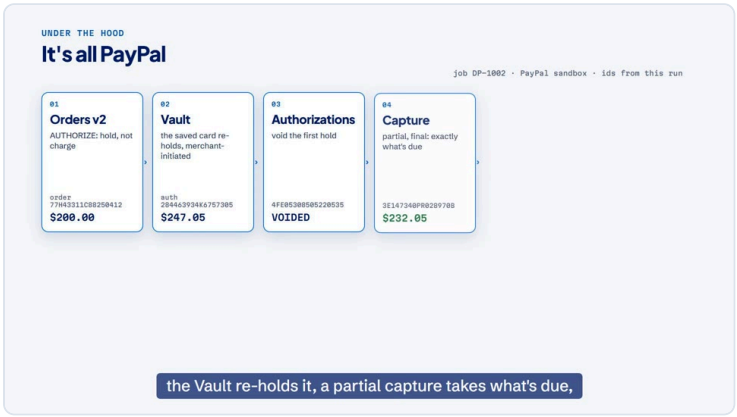

1:56.3–2:09.5 · 13.2 秒 · 1.25 倍

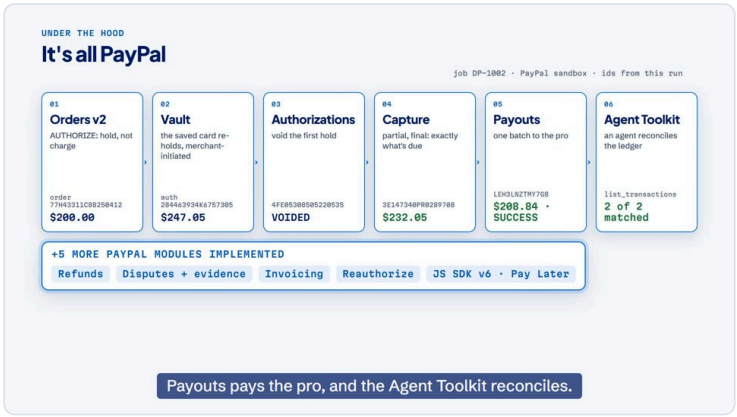

畫面

30B 開源老師 → 0.6B 學生 → GGUF Q8 · 639 MB → L4 GPU。99.9% 判對、0.4% 攻擊得逞、100% 議價在上限內、0.51% OCR 錯字率。

旁白

We fine-tuned 0.6-billion-parameter models from a 30-billion open teacher. Code writes every label, and the teacher only writes the wording. On held-out tests, the audit model gets 99.9% of verdicts right, and it runs on one GPU in about a third of a second.

11 底層全是 PayPal

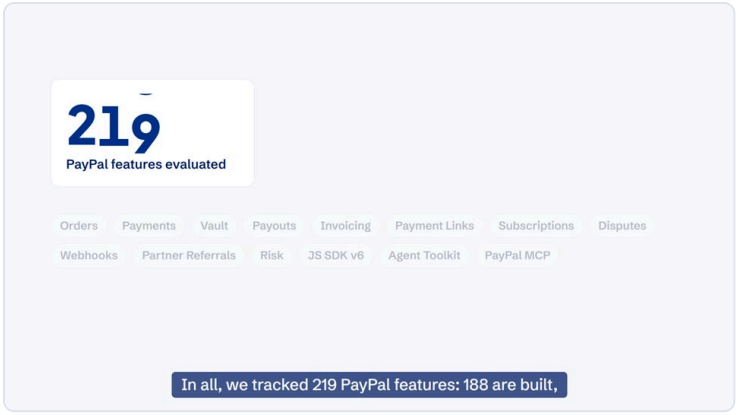

2:09.5–2:17.9 · 8.4 秒 · 1.25 倍

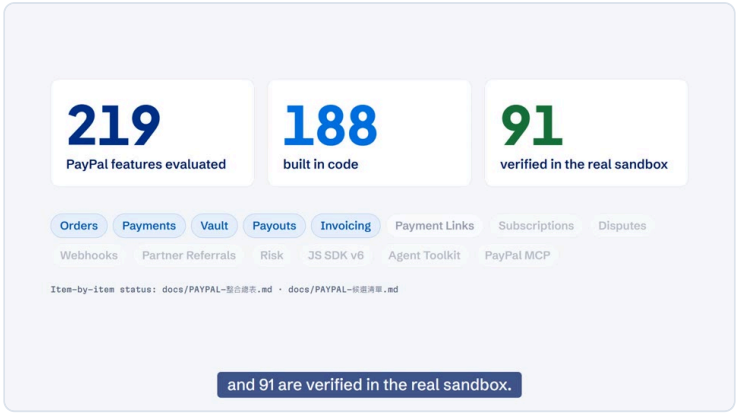

畫面

Orders 授權、Vault 重新凍結、部分請款、Payouts 付款、Agent Toolkit 對帳。

旁白

Every step runs on PayPal: Orders authorizes the hold, the Vault re-holds it, a partial capture takes what's due, Payouts pays the pro, and the Agent Toolkit reconciles.

11a 219 項 PayPal 功能 新

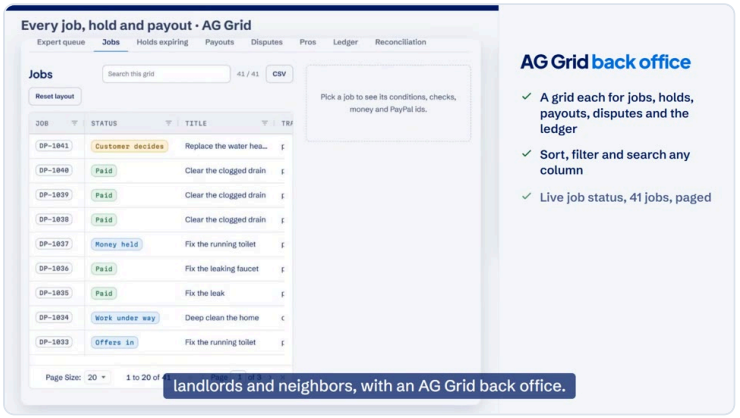

2:17.9–2:24.6 · 6.7 秒 · 原速

畫面

219 評估 • 188 寫了程式 • 91 在真實 sandbox 驗證；14 個產品標籤依序亮起。旁白縮短，不再重複 11 的內容。

旁白

In all, we tracked 219 PayPal features: 188 are built, and 91 are verified in the real sandbox.

12 規模、AG Grid 後台、測試

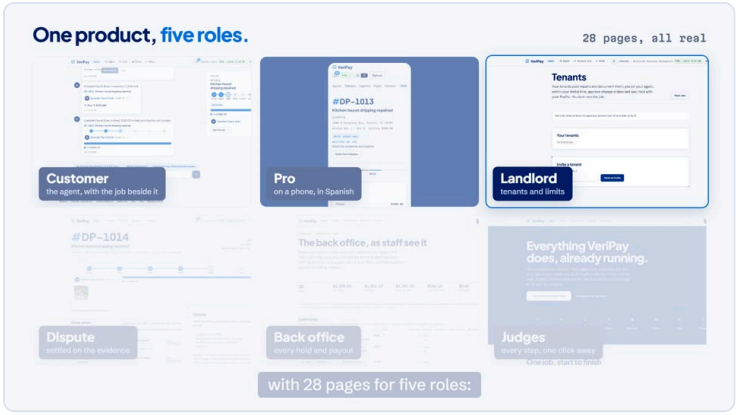

2:24.6–2:38.4 · 13.8 秒 · 1.25 倍＋AG Grid 慢放

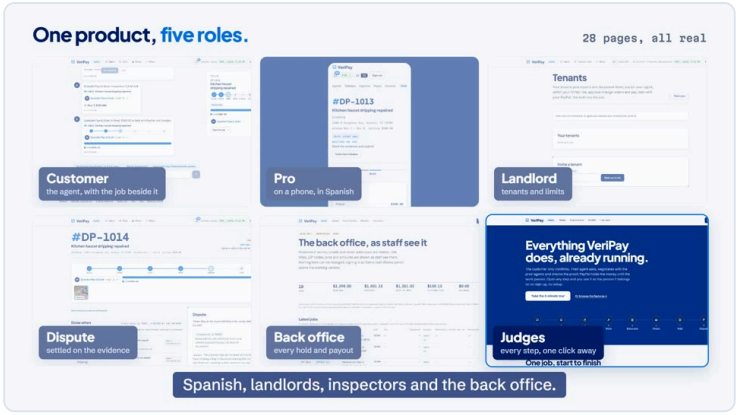

畫面

材料款、Pay Later、房東、鄰居團購 → AG Grid 後台停留 3.6 秒、推近 1.3 倍，右側列出功能 → 45 次代理人測試。

旁白

It also covers materials, Pay Later, landlords and neighbors, with an AG Grid back office. AI agents tested it in forty-five runs over eleven rounds, and we fixed every blocker they found.

12a 完整產品 新

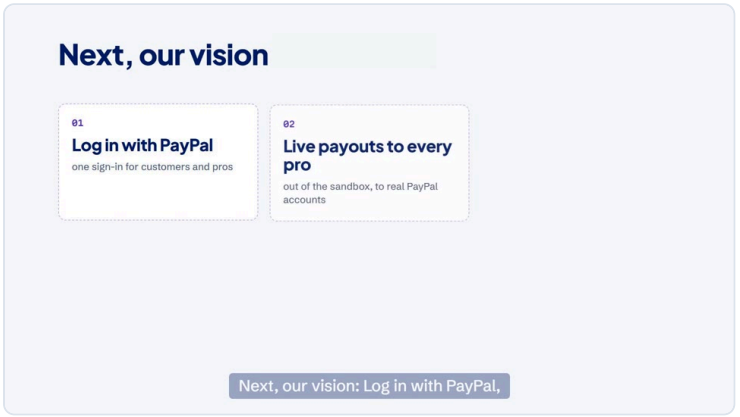

2:38.4–2:47.4 · 9.0 秒 · 原速

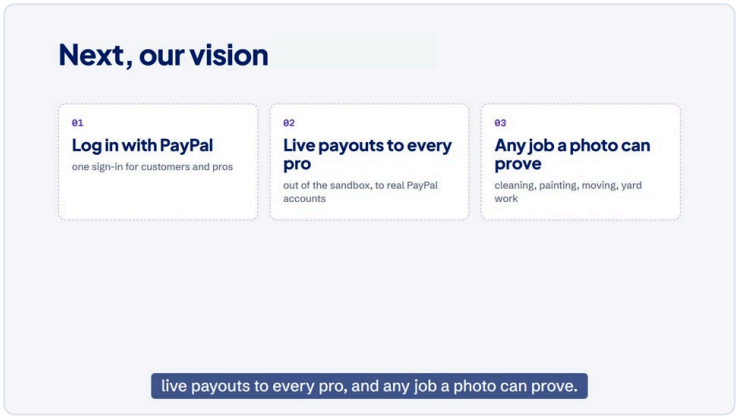

畫面

3×2 便當格：客戶 · 師傅手機（西班牙文）· 房東 · 爭議 · 後台 · 評審 /demo，大角色標籤，依序亮起，最後全亮。

旁白

It's also a complete product, with 28 pages for five roles: the customer's agent, the pro's phone in English or Spanish, landlords, inspectors and the back office.

12b 下一步願景

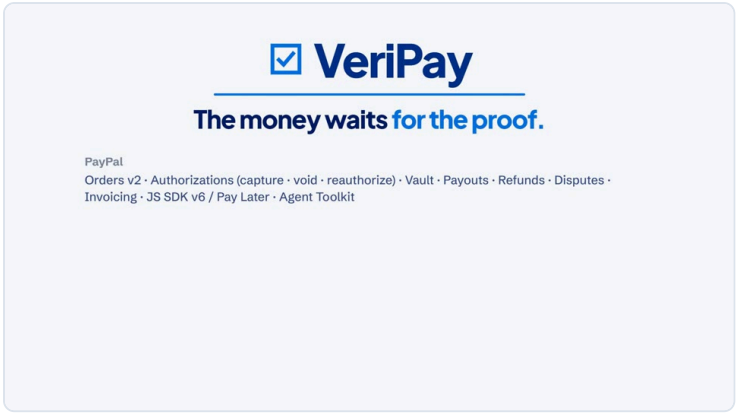

2:47.4–2:53.3 · 5.9 秒 · 1.25 倍

畫面

標題「Next, our vision」：Log in with PayPal、即時付款給每位師傅、任何能用照片證明的工作。虛線框表示是下一步。

旁白

Next, our vision: Log in with PayPal, live payouts to every pro, and any job a photo can prove.

13 片尾卡

2:53.3–2:58.5 · 5.2 秒 · 0.72 倍

畫面

VeriPay、The money waits for the proof、PayPal 與 AI 清單、github.com/gino6178/veripay、Try it: Demo → Judge tour。不放字幕，避免蓋住網址。

旁白

VeriPay. The money waits for the proof.
